

# site plan

Site URL:

1. **Navigation** diagram of your web site. Well planned navigation increases your site's usability by helping your visitor easily find content and information they are looking for. A good plan from the beginning will allow pages to be easily added or re-organized for future expansion and serves as a 'road map' of the pages on your server. Fill in the page names. Add or cross off as necessary.

Additional comments and/or special considerations:
